

Soundcore Liberty 3 Pro

True Wireless Earbuds with ACAA 2.0 Technology

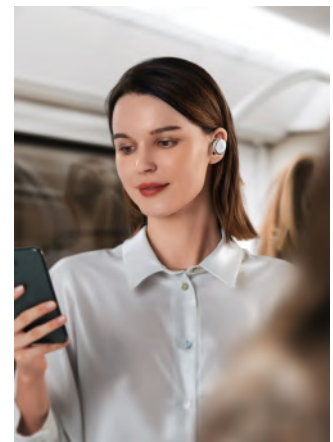

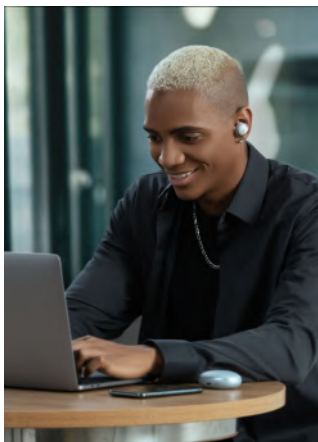

ACAA 2.0: Our exclusive coaxial dual driver technology delivers high and low frequency sound directly to your ear without interference. Its wide soundstage is detailed and spacious, bass has a deep punch, mids are luscious, and treble sparkles.

Personalized Noise Cancelling: Standard noise cancelling only adjusts noise based on data. HearID ANC analyzes your ears and level of in-ear pressure to create a tailored profile that optimizes noise reduction and reduces external sound to suit your ears.

Fusion Comfort Fit: Liberty 3 Pro's earbuds have a triple-point ergonomic shape and built-in ear pressure relief for all-day comfort. 4 sizes of liquid silicone ear tips and flexible ear wings ensure you get a strong seal and secure grip.

Up to 32 Hours of Playtime*: Enjoy up to 8 hours of music from a single charge, plus get 3 full charges from the compact charging case to extend the playtime even further. Recharge the case via USB-C cable or wireless charger.

Astria Coaxial Acoustic Architecture 2.0: A 10.6mm dynamic driver and a balanced armature driver are aligned on a single axis to deliver pure, detail-rich sound to your ears.

HearID Active Noise Cancelling: Noise cancelling is automatically tailored to both your ears and your surroundings for a precise and comfortable experience.

Multi-Mode Transparency: For total awareness of your surroundings use Fully Transparent, reduce low frequency noise and amplify voices around you with Vocal, or increase the volume of voices further with Enhanced Vocal.

Lossless Sound Transfer: Liberty 3 Pro wireless earbuds support LDAC technology which transfers 3x more data than other Bluetooth codecs to preserve detail.

3D Surround Sound: The algorithm processes audio in real-time and enlarges the sound field for an instantly immersive listening experience**.

Clear Calls: 6 microphones and an AI-uplink noise reduction algorithm pick up your voice and filter out background noises for enhanced clarity.

Multipoint Connection: Connect Liberty 3 Pro noise cancelling earbuds to 2 devices and switch between them effortlessly.

Extended Playtime: Get 8 hours from a single charge and up to 32 hours with the charging case*.

Wearing Detection: Sensors in the earbuds detect when one is removed and pause the music until the earbud is returned to your ear.
