

On Demand Migration for Email

Fast, reliable Office 365 and Exchange migration with zero footprint

With the growing maturity of Microsoft Office 365, many organizations are moving to the Microsoft cloud to take advantage of the functionality on offer.

Whether migrating from on-premises environments or cloud alternatives, such as Gmail, you need a fast and secure migration solution to avoid end-user disruption.

Quest® On Demand Migration for Email securely migrates to on-premises and cloud-based email platforms without requiring software installation or maintenance. From a single console, administrators can simultaneously migrate the mailbox data of multiple users, moving email, contacts, calendars and folders in a phased approach.

The solution even helps remove unwanted data during the migration process, shortening the time it takes to complete the move.

This solution is built on the Microsoft Azure platform. When migrating to Office 365, there's no better platform to run the migration than Microsoft's own cloud service deployment, hosting and management environment. Azure provides on-demand processing power to run the migration. Plus, no email messages are ever stored in Azure, ensuring privacy needs are met. On Demand Migration for Email delivers a scalable solution that can accommodate any number of mailboxes and ensures a quick, low-cost, highly secure migration.

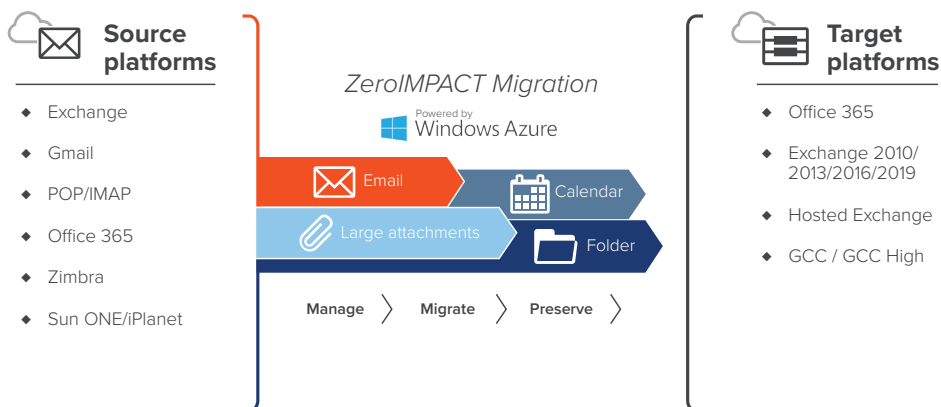

On Demand Migration for Email delivers a scalable solution that can accommodate any number of mailboxes and ensures a quick, low-cost, highly secure migration.

BENEFITS:

- Ensures a quick, reliable and low cost migration to Office 365, Exchange 2010/2013/2016/2019 or hosted Exchange
- Migrates some or all users simultaneously
- Migrates with no on-premises deployment needed
- Ensures security of confidential data during migration
- Provides pay-as-you-go options to spread the investment over time
- On Demand Migration for Email is included in the scope of the Platform Management ISO/IEC 27001, 27017 and 27018 certification

On Demand Migration for Email

On Demand Migration for Email quickly and securely migrates email, calendar and folder data to Office 365 and Exchange without having to install or maintain migration software.

FEATURES

Zero footprint — Provides all the benefits of software as a service (SaaS), eliminating the need to install or maintain a solution on premises.

Migrate primary and personal archive — Migrate mail to the primary mailbox or archive mailbox for each user.

Label conversion — Migrates email folders while maintaining their labels and nested structure.

Delta Migration — Re-migrates data using a phased approach.

Assured security — Ensures the security of your organization's confidential and proprietary data throughout the migration process.

Live logging — Enables you to monitor the progress of each migration, including the status and any errors that may occur.

Intuitive management — Provides consolidated access and control with real-time status updates on the entire migration.

Data filtering — Provides the ability to filter email and calendar events by age or to exclude source email folders. These filtering options enable you to migrate only what you want, where you want it.

Multi-threaded migration — Supports multiple, simultaneous migrations, ensuring your project completes on time.

Cloud-based forwarding — Provides automated mail routing updates in some scenarios to streamline the transition processes.

ABOUT QUEST

Quest creates software solutions that make the benefits of new technology real in an increasingly complex IT landscape. From database and systems management, to Active Directory and Office 365 management, and cyber security resilience, Quest helps customers solve their next IT challenge now. Quest Software. Where next meets now.
